Why Use sun-@-bed?

Sundown are pleased to introduce a brand new bedding that can be delivered directly to your door.

sun-@-bed provides a highly absorbent bedding that eliminates odour and is quick and easy to use. Customers have found it super efficient, removing very little bedding each day and that any waste product rots down quicker than wood based bedding.

The product is a crumbled straw pellet that expands and 'fluffs' over time increasing the volume and comfort of the bed. The straw is locally sourced and is 'the sustainable choice', being an annual by-product of agriculture.

sun-@-bed is available as a pallet of 65 (15kg) bags providing huge space saving benefits over conventional bedding.

Generally people use 6-9 bags to create an initial bed, plus an additional 1-2 bags per week to top up ie 1 pallet = 6-12 months supply for 1 horse.

**Delivered Price
per 15kg bag
£4.95 + VAT**

(£321.75 + VAT
per pallet)
